Information Technology Undergraduate | semininm19@gmail.com | +94 70 704 3462 | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Detail-oriented Information Technology undergraduate at SLIIT with hands-on experience in software development, requirements analysis, system design, and usability testing through academic projects. Skilled in analytical thinking, problem-solving, and team collaboration, with a strong interest in understanding business needs and translating them into effective technical solutions. Seeking a Business Analyst internship to apply technical knowledge, strengthen analytical skills, and contribute to business process improvement.

EDUCATION

Bachelor of Information Technology (Information Technology Specialization)

Sri Lanka Institute of Information Technology (SLIIT) | 2024 – Present | Expected Graduation: 2028

GCE Advanced Level (2021) – Physical Stream | R/Ferguson High School | 2008 – 2021

PROJECT EXPERIENCE

HeritageWalk Sri Lanka – Smart Heritage Tourism Mobile Application (2026)

Developed a user-centered mobile application to enhance heritage tourism in Sri Lanka through personalized tour planning, historical site discovery, interactive navigation, and safety features.

- Analyzed user needs and contributed to defining functional and non-functional requirements.
- Designed user-friendly interfaces and navigation workflows using HCI principles.
- Developed map-based navigation, digital guide, nearby facilities, and safety-related features.
- Contributed to usability evaluation and functional testing to improve the user experience.

Technologies: Flutter, Dart, Firebase, OpenStreetMap, OSRM

KuppiConnect – Peer-to-Peer Student Learning Management System (2026)

Developed a collaborative learning platform enabling students to share resources and engage in academic discussions.

- Implemented content sharing and resource management features.
- Developed note upload and discussion forum functionalities.
- Integrated resource rating and feedback mechanisms.
- Contributed to AI-powered content summarization.

Technologies: MERN Stack (MongoDB, Express.js, React.js, Node.js)

NovaCampus – University Resource Management System (2026)

Developed a centralized platform for managing university resources and user interactions.

- Implemented notification management features.
- Developed role-based access control mechanisms.
- Contributed to authentication and authorization processes.
- Enhanced communication through automated notifications. **Technologies:** Spring Boot, Java, SQL

WoodArt Gallery – E-Commerce Platform (2025)

Developed an e-commerce application for showcasing and selling handcrafted wood art products.

- Implemented external designer management functionality.
- Assisted in backend development and database integration.
- Improved product management and user experience.

Technologies: MERN Stack (MongoDB, Express.js, React.js, Node.js)

Online Bidding System (2025)

Developed an online auction platform for bidding and purchasing products.

- Implemented advertisement management features.
- Developed customer feedback and review functionality.
- Contributed to auction and product management processes.

Technologies: Java, SQL

TECHNICAL SKILLS

Tools: Jira, Figma, Microsoft Excel, Git, GitHub

Programming: SQL, Java, JavaScript, C, C++, Dart

Databases: MySQL, MongoDB, SQL Server, SQLite, Firebase

Web Technologies: React, TypeScript, HTML, CSS, JavaScript,

CERTIFICATIONS

Certification of Information and Technology – OUSL (2022)

Microsoft Business Analyst Professional Certificate (In Progress)

SOFT SKILLS

Attention to Detail | Analytical Thinking | Problem Solving | Team Collaboration | Communication | Time Management | Adaptability
